Welcome to my PDF! It contains lots of cool stuff, like the following limerick from Peter Shor about quantum computers:

If computers that you build are quantum,
Then spies of all factions will want 'em.
Our codes will all fail,
And they'll read our email,
Till we've crypto that's quantum, and daunt 'em.

Anyway, you can also run this PDF in Python.

Just download it, go to your command line, navigate to the directory containing it, and type

```
python3 example.pdf
```

I promise it doesn't contain malware ;-)
